SLBO-D-LT_TDS_V2-2/11/2017 *Allergene list 07/12/2015

Chain oil for low temperatures

The Frontmtec SLBO-D-LT is a food grade NSF-H1 registered, high-quality, ICE-preventing, chain oil intended for application in the food and drink industry for temperatures from -40°C and up to +150°C.

The Frontmtec SLBO-D-LT is highly resistant to aging and free from resinification. The SLBO-D-LT can be used in locations in which there is a potential exposure of the lubricated part to food, and it offers a good protection against corrosion and is well compatible with plastics and sealings.

SLBO-D-LT is compatible with mineral oils and is specifically designed for chains operating in chill rooms and quick chill tunnels, where it penetrates into the chains' inner surfaces. At the same time, it is formulated to refrain from dripping down from the chains, and by use of sufficient amount of lubrication oil SLBO-D-LT, it can even prevent ice building on the chains' outer surfaces, because of use of our unique ANTI-ICE™ additive.

Specifications

Chemical composition	Synthetic hydro-carbons registered according to NSF-H1, plus specially designed additives. All NSF-H1 registered.
NSF H1 Reg. number	149761
Appearance	Clear, bright
Operating temperature	-40°C to +150°C/-40°F to +302°F
Viscosity index	138
Refractive index	1,460-1,465
Package	50 l/small barrel 200 l/large barrel 13.2 gal/small barrel 52.83 gal/large barrel

Technical changes are subject to alterations.
