

TEAMING UP WITH YOUR SERVICE SPECIALISTS

How to have **optimal meat quality** with your ML-7 CO₂ stunning system

Achieve yield improvements with smooth handling and optimal flow of pigs by having your certified Frontmatec specialists verify the condition and tension of the main chain as well as ensuring that the condition of the gondola shafts, block bearings and bushings, are optimal.

Maintain high performance with high animal welfare by using skilled and experienced technicians, who perform a certified measuring and calibration of the carbon dioxide gas in the stunning system as well as securing an optimal function of electrical sensors for precise start and stop of the gondolas.

Stay prepared for the unexpected by stocking critical spare parts for daily operation, such as gears, motors and the CO₂ sensor.
