

Manual chine bone saw

Sustainable efficiency

The manual chine bone saw is a highly energy-efficient tool and up to 8 times more energy-efficient when compared to other drive methods, such as pneumatic and hydraulic.

Being an electrical plug'n play solution, with fast installation and low maintenance cost, it makes the overall operational cost best in class.

To maximize operation efficiency the manual chine bone saw can be adjusted to the travel direction of the conveyor. The ergonomic design and suspension set-up takes the strain from the operator making it very easy to handle and therefore ensuring precise cutting of the chine bone for increased yield.

The manual chine bone saw is CE approved and designed in accordance with EU and USDA regulations and be delivered with the following options:

- Height adjustable platform with nonslip bases
- Noise insulated box
- Mounting of noise absorbing material on walls
- Cutting belt with grooves or spikes for holding the middles
- Separate operator control panel

Please do not hesitate to contact your local After Sales department for more information.

Value for you!

- Yield improvements
- Best price for meat
- Maximize operation efficiency
- Cost savings on maintenance
- High level of sustainability
- High level of food safety (FDA-approved)
