

PORK SOLUTIONS // BLADE BONE PULLER

MAXIMIZE SHOULDER YIELD MADE EASY

For a physically demanding operation performed manually, the blade bone puller is the operator's mechanized assistant, relieving the operator of excessive strain on shoulders, elbows, and fingers. The blade bone puller is very stable, and maintenance is limited to replacing a spring once in a while. Since the first puller left the workshop, and after more than 200 installations, there have been no complaints.

Hygiene

The machine complies with the strictest hygiene demands.

Options

- Available in two versions - one for pigs and one for sows
- Usage at both one-man tables and in cutting lines

Safety and legal requirements

The blade bone puller is CE approved and designed in accordance with the EU and USDA regulations to meet the strictest demand on health and safety.

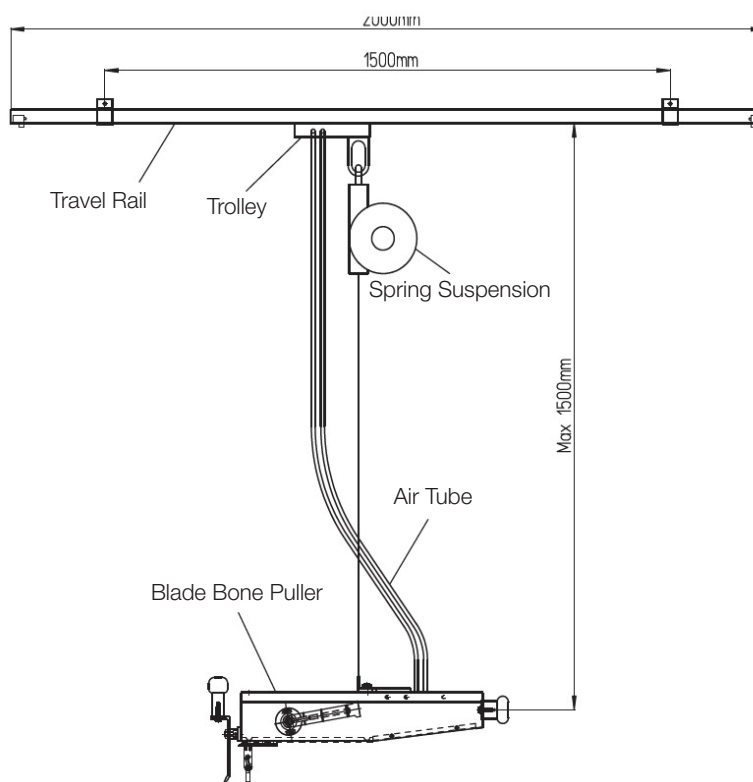

Why the Blade Bone Puller!

- One-hand operation - easy to handle
- Reduces hard manual work, relieving excessive strain to shoulders, elbows and fingers
- Adjustable pulling speed
- Easy to adjust to both left and right
- Low maintenance
- No special training needed prior to operating the machine
- Minimum noise and vibration
- Spring suspended and weightless; easy to push aside when not in use
