

CONTROLS // IT SECURITY

HANDLE IMPORTANT DATA WITH FRONTMATEC NETWORK

Your network is the heart of your process plant. It handles important data and communication between your systems, components, and control units.

Errors and failures in the network can have significant consequences for the operation of your plant. To minimize the risk of downtime, we recommend that network maintenance to be done to the same extent as the rest of the plant.

Let us help you before it's too late!

At Frontmateg, we have more than 20 years of experience in Industrial IT, and we see ourselves as a strong provider of IT security and data management solutions. Through our close collaboration with suppliers and industry organizations, we have the necessary knowledge about the current threat level and vulnerabilities, which contribute to making our solutions even stronger.

Frontmateg Network gives you:

- Higher IT security level
- Reliable connections
- Less troubleshooting and downtime
- Better quality and durability
- Network specialists primarily dealing with OT environments
- Standardized and structured solutions that ensure consistency
