

SERVICE SOLUTIONS // WHIPS AND PADDLES

ENSURE A EFFICIENT DEHAIRING WITH OUR WHIPS AND PADDLES

Frontmatec is known for the excellent quality of our whipping belts and paddles, which ensure an efficient dehairing through high performance of your equipment.

Whipping belts

Based on the sophisticated and unique technology, the anti-bacteria whipping belt is made from a special rubber compound which prevents growth of bacteria - e.g. salmonella. Produced on modern computer-controlled injection machinery they are designed to fit working conditions in either hot or cold water.

The whipping belt is easily mounted with a brass bushing in mounting holes for 10 mm bolts.

The whipping belts are CE approved and designed in accordance with the EU and USDA regulations to meet the strictest demand on health and safety.

Dehairing paddles

Paddles are made from a high quality raw rubber material constructed to ensure perfect dehairing of the carcass. Paddles are available in both nature rubber and synthetic rubber and designed for pigs from 120 kg to over 150 kg and are compatible with other dehairing machines.

With below mounting kit paddles are easy to mount and even easier to dismount.

Value for you!

- Whips: Antibacterial rubber compound
- Paddles: High quality raw rubber material
- High level of food safety
- Low maintenance
- Long life-time
- Ensuring high performance
- Easy to mount
- Cost efficient
