HOW TO MAINTAIN EXCEPTIONAL PRECISION IN GRADING AND PREDICTION WITH YOUR BCC-3

Maintain yield improvements by having your certified Frontmateg specialists align and calibrate the cameras essential for the accurate chemo metric data modeling needed to achieve exact prediction of the primal and commercial cut of each carcass and ensure you best price for meat.

Maintain a smooth operation with prolonged life-time with the help of your skilled and experienced service specialists, who can verify which light source window, camera window and LEDs have to be changed for you to achieve precise measurements as well as ensuring that IP69 certifications are met.

Stay prepared for the unexpected by stocking critical spare parts for daily operation, such as a calibrated camera/lens unit, camera windows and a calibration target for morning test.
